

Product Specification

Thermobond Corner

Thermobond corners are used for covering inside/outside corners in combination with Thermobond R splice strip. The corners are spliced with hot air.

Technical data

Product	Thickness (mm)	Size XYZ (mm)	Package (pcs/box)
Inside corner	2.5	X:100 Y:100 Z:100	40
Outside corner	2.5	X:100 Y:100 Z:100	40

Storage

Store cool and dry in the original packaging. There are no limitations in shelf life.

Thermobond

Thermobond seaming technique is unique and patented by SealEco. Thermobond is based on a thermoplastic rubber (TPE-base) that can be seamed with conventional seaming methods for plastic material like hot air or hot wedge seaming.

The Thermobond material is the base for a full range of accessories that gives good system solutions combining the unique properties of an elastomeric membrane with the seaming properties of the thermoplastics.

Installation instructions

Please consult installation manual for more instructions.
