

Product Specification

Thermobond R Splice Strip

The Thermobond R (Reinforced) splice strip is used for making connections between membrane and for detail works like flashings and upstands. The product is built up by a top layer of reinforced EPDM and a bottom layer of Thermo-bond. The recommended width for connections membrane to membrane is 150 mm.

Technical data

Reinforcement: Scrim of Polyester

Width (m)	Thickness (mm)	Length (m)	Weight (kg/roll)	Max roll/pallet
150	1.5	20	5.9	15x8
300	1.5	20	11.7	15x4
450	1.5	20	17.6	15x2
600	1.5	20	23.4	15x2
900	1.5	20	35.1	15x1

Storage

Store cool and dry in the original packaging. There are no limitations in shelf life.

Thermobond

Thermobond seaming technique is unique and patented by SealEco. Thermobond is based on a thermoplastic rubber (TPE-base) that can be seamed with conventional seaming methods for plastic material like hot air or hot wedge seaming.

The Thermobond material is the base for a full range of accessories that gives good system solutions combining the unique properties of an elastomeric membrane with the seaming properties of the thermoplastics.

Installation

Check installation manual for more information.
