

Product Specification

Thermobond Splice Strip

The Thermobond Splice Strip is used for making round shaped details like pipe boots or outlets. The product is built up by a top layer of EPDM and a bottom layer of Thermobond that can be melted for splicing.

Technical data

Reinforcement: None

Width (mm)	Thickness (mm)	Length (m)	Weight (kg/roll)	Max roll/pallet
100	1.5	20	3.9	15x12
150	1.5	20	5.9	15x8
200	1.5	20	7.8	15x6
450	1.5	20	17.6	15x2
600	1.5	20	23.4	15x2
900	1.5	20	35.1	15x1

Thermobond

Thermobond seaming technique is unique and patented by SealEco. Thermobond is based on a thermoplastic rubber (TPE-base) that can be seamed with conventional seaming methods for plastic material like hot air or hot wedge seaming. The Thermobond material is the base for a full range of accessories that gives good system solutions combining the unique properties of an elastomeric membrane with the seaming properties of the thermoplastics.

Storage

Store cool and dry in the original packaging. There are no limitations in shelf life.
