

TECHNICAL DATA SHEET

SUPPORT STRIP

The Support Strip is a reinforced EPDM strip that facilitates easier splicing of Thermobond R Splice Strip to rubber membranes using automatic hot air machines. The support strip is placed on top of the Thermobond R Splice Strip that should be connected to the rubber membrane and keeps the underlying layers in place during splicing. Folds in the splice are avoided as the pressure from the machine is leveled out.

The Support Strip comes with a handle that makes unrolling and rerolling easier.

Technical data

Thickness:	5.0 mm
Reinforcement:	Double reinforced
Length:	10 m
Width:	155 mm

Storage

There are no restrictions or limitations for storage.
