

# TECHNICAL DATA SHEET

## EPDM PE DRAIN

Roof drain in polyethylene (HDPE) with an EPDM flange.  
The drain can be secured to SealEco EPDM roof membranes with Flashing Tape.

### Technical data

<b>Type of tube:</b>	Polyethylene HDPE
<b>Thickness tube:</b>	Min. 3 mm; depending on the diameter
<b>EPDM type:</b>	RubberTop
<b>Thickness EPDM:</b>	1.2 mm
<b>Colour:</b>	Black
<b>Shelf life:</b>	Store cool and dry in the original packaging. There are no limitations in shelf life.

### Packaging

Diameter (mm)	Length (mm)	Flap (mm)	Discharge flow rate (L/sec.) (*)	Packaging (pcs/box)
32	500	280 x 280	to be determined	25
40	500	280 x 280	to be determined	25
50	500	280 x 280	to be determined	20
56	500	280 x 280	to be determined	18
63	500	280 x 280	to be determined	15
75	500	280 x 280	to be determined	15
90	500	280 x 280	5.2	12
110	500	400 x 400	8.9	9
125	500	400 x 400	to be determined	9
160	500	500 x 500	to be determined	4
200	500	500 x 500	to be determined	4
250	500	500 x 500	to be determined	4

Availability depending on country. Please contact your local supplier for more information.

(\*) Vertical drainage.

### Directions for use

Follow all guidelines as described in the manual of the relevant EPDM system.

### Suitable substrates

An EPDM PE Drain can only be used on SealEco EPDM membranes. All surfaces to be connected must be clean and dry. If the EPDM has oxidized, it should be grinded with a nylon brush and cleaned, before splicing.

The EPDM PE Drain cannot be installed in temperatures below +5°C and above 30°C; during rain, mist or where there is a risk of condensation or strong winds. When applied between +5°C and 15°C SealEco recommends to store the drain and the adhesives at room temperatures prior to use. Consult our installation manuals for more information.

### Note

Read the safety data sheet (MSDS) before usage.
