

TECHNICAL DATA SHEET

CLEANER 17

Cleaner 17 is an acetone-based cleaning agent which contains a gas held under constant pressure. It can be sprayed without electricity or a compressor. Cleaner 17 is used for cleaning tools and rubber hoses meant for adhesives.

Adapter E17 Cleaner

Technical data

Base:	Acetone 50 - 60%
Colour:	Colourless
Consistency:	Liquid
Density (at 20°C):	0.700 g/cm ³
Shelf life:	Max. 12 months in an unopened container. Store in a dark, dry and well ventilated environment at temperatures in between +5°C and 20°C.

Packaging

Volume (L/can)	Weight (kg/can)
0.5	0.35

Availability depending on country. Please contact your local supplier for more information.

Coverage

Depending on the part to be cleaned. About 1 canister for cleaning a rubber hose.

Directions of use

Cleaner 17 is used for cleaning rubber hoses meant for adhesives. The cleaner prevents the residue in the hose from hardening. Refer to the instructions "Canister Instructions SealEco" for use of the adhesive and disconnection of the rubber hose. Connect the Adapter E17 Cleaner to the hose. Screw the Cleaner 17 onto this adapter. Make sure that the spray gun is open during this operation. Cleaner 17 should flow out of the spray gun immediately. Purge the hose until there is no more residue within. The liquid should be colourless and spray without difficulty. Once a rubber adhesive hose has become clogged, it must be replaced.

Note

Cleaner 17 is highly flammable. Read the safety data sheet (MSDS) before transport, storage and usage.
